PROFILE

AI Developer with hands-on experience building ML models, LLM-powered applications, and full-stack web systems. Proven ability to deliver production-ready solutions across computer vision, generative AI, and backend development.

EXPERIENCE

Crismatech Automation

Web Development Intern

Jan 2026 – Apr 2026

Bengaluru, Karnataka

- Built a full-stack student e-learning portal from the ground up.
- Developed course browsing, student enrollment, and progress tracking features.
- Designed a responsive UI for seamless access across desktop and mobile devices.
- Integrated backend APIs to manage student data, course content, and authentication.

Zetpeak

AI/ML Intern

Aug 2025 – Dec 2025

Bengaluru, Karnataka

- Built and optimized ML models using Python, Scikit-learn, and TensorFlow for real-world applications.
- Developed AI-powered REST APIs using FastAPI and Flask integrated into web applications.
- Worked with LLMs and prompt engineering to design intelligent automation workflows.
- Collaborated with frontend teams to integrate AI modules into React applications.
- Improved model inference performance using efficient preprocessing and caching techniques.

PROJECTS

Deepfake Detection | Python, Deep Learning, Jupyter Notebook

- Developed classification models achieving 92%+ validation accuracy using TensorFlow and Scikit-learn on datasets containing 100k+ samples.
- Combined deep learning models with multi-modal analysis to detect manipulated images and videos.
- Designed evaluation pipelines for improved detection accuracy across varied media formats.

AI Code Reviewer | Python, LLM

- Developed an AI-powered tool to analyze GitHub repositories for code quality and security issues.
- Combined static analysis with LLM reasoning to detect vulnerabilities and bad practices.

InBox-AleRt | Python, FastAPI, Next.js, Redis, Docker

- Built an AI-powered email monitoring system that sends real-time WhatsApp alerts for high-priority emails.
- Designed a two-stage AI scoring engine using rule-based filtering and LLM to score emails from 0–100.
- Integrated Gmail Pub/Sub and Outlook Graph API webhooks with asynchronous processing via Celery and Redis.
- Implemented AES-256 encryption, RS256 JWT authentication, and OAuth 2.0 for secure multi-account support.

EDUCATION

Garden City University

B.Tech in Artificial Intelligence and Machine Learning

Aug 2022 – May 2026

Bengaluru, Karnataka

SKILLS

Languages: Python, SQL

AI / ML: TensorFlow, PyTorch, Scikit-learn, OpenCV, LLMs, Deep Learning

Backend and APIs: FastAPI, Flask, REST APIs

Frontend: React, HTML, CSS

Databases: MongoDB, MySQL, SQLite

Deployment and DevOps: Docker, GitHub Actions, AWS, GCP, Render, Vercel, Linux

Tools: Git, Jupyter Notebook, Web Scraping
